(54) ANTIREFLECTION FILM, OPTICAL FUNCTIONAL FILM USING THE SAME AND DISPLAY UNIT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an antireflection film capable of easily controlling the color of reflected light, excellent in antireflection function, antifouling property, scuffing and wear resistances and also having electromagnetic wave shielding function, to provide an optical functional film using the antireflection film on the surface and having high-contrast display performance and to provide a display unit such as a display.

SOLUTION: In the antireflection film obtained by disposing an antireflection layer on a base comprising a plastics substrate, the antireflection layer includes at least a light absorbing layer and the outermost surface comprises an antifouling low refractive index layer.
